

PRESS RELEASE: CR-V 2010

The sector leading CR-V just got better

CR-V was already an award winning segment leader, but we've now made it even better. 2010 will see the launch of the enhanced CR-V, now boasting a new diesel engine and refreshed styling.

The 2010 CR-V will come with our new 5-speed automatic gearbox, which will be available with the new smooth and refined i-DTEC diesel engine, originally debuted in the Accord.

Restyled Exterior

Now, three years after its launch, the exterior has been restyled. All grades now have a distinctive new front bumper and grille, a revised rear bumper and 17" alloys. The ES and EX grades have 18" alloys, while the EX has colour coded bumpers.

Refined Interior

The interior has been upgraded too, with a new audio console design and interior trim. Improved sound insulation ensures the CR-V is an even quieter car to drive.

A roomy two-tiered boot space, exceptional whole life costs and high spec features throughout continue to make the CR-V a genuine alternative to the estate car.

**Full specification and pricing announced on 2 November 2009.
On sale date January 2010.**
